Andy,

I was talking to Matt this morning and he said to mention to you that it would be good to get any pictures if possible. Especially any of sheen on the canal.

Thanks,

Ellen

Quick follow up...

We will meet with USCG and IDEM on site in the morning. We will be prepared to take samples, including for fingerprinting. IDEM has indicated the release is emanating from outfalls linked to Arcelor mittal, however they deny it is theirs.

Look for an update after we investigate tomorrow.

Andy

All,

Jason and I spoke with the USCG and will be sending OSC Maguire and OSC Beslow out tomorrow morning to do a joint assessment with the CG.

Hi Sonia:

Do you have some time for a short discussion? I'd like to get some more information about what is planned.

Thanks,

Kasey

Please see USCG message below for contact information.

Just got out of a call with USCG and they are proposing a joint site visit tomorrow morning.

Thank you,

Good afternoon,

Arcelor Mittal Indiana Harbor Inc. has a National Pollutant Discharge Elimination System Permit. Pollution may be coming from this facility's outfall. We believe further investigation is warranted. POC Thomas Barnett O: 219-399-2380, C: 219-313-1605. Thank You!

Very Respectfully,
LT Paul Arnold
